DESIGNING & PRINTING

Key card design is an overlooked and underutilized facet of hospitality marketing. A surprising number of hotels use blank, bland, or generic key cards due to budget constraints or a lack of creativity. Ironically, these are often the same businesses that

invest loads of time and energy designing business cards, tri-fold brochures, and small promotional items for the same hotels. They design these marketing materials with the

sole objective of getting them into customer pockets, ignoring the fact that key cards end up in customer pockets automatically. In fact, whether they have a blank design or a bold one, most key cards end up going home with the customer.

It's more efficient and more effective to invest time and resources into designing. Thankfully, some hotels are using custom key cards to make strong

Wouldn't it be more cost well

impressions on their customers at a very good value.

CUSTOMIZED RFID TAGS & FOB

Want personalized RFID key fob? We can create it for you. You will love to know that we can customize RFID key fobs with your own design and/or logo. Just send us your preferred design and rest assured to have an excellent quality key fob created as per your choice. Pick from the wide range of colors available such as blue, black, white, yellow, green, red, orange, gray, brown, just to name a few! From personalized photo to number, we offer complete customization options at budget friendly prices. Fulfilling customer's requirement is what we thrive for.
